

## Wabi-kusa with Plant Glass

The introduction of Wabi-kusa has broaden the ways to enjoy aquatic plants. One can enjoy emersed aquatic plants simply by placing Wabi-kusa in a Plant Glass. With Wabi-kusa, the expression of aquatic plants can be more feasible and unique by arranging with other materials such as driftwood.

Wabi-kusa mainly composed with *Ludwigia peruviana* red and *Rotala indica* in Plant Glass Valley (NEW) with wide open mouth. Watching how they grow from here gives us a great joy.

Plant Glass Oval 25 with Wabi-kusa mainly mixed with *Rotala rotundifolia*. In flower season, pretty pink flowers come out one after another.

The new type of Plant Glass, Carafe (NEW) is cut diagonally at its mouth. Wabi-kusa with aquatic plants grow upward along the glass surface is suitable for this type of Plant Glass.
